SOCIAL BUTTERFLY AI™ · A SHORT GUIDE

# How to save your app before Firebase Studio closes.

Firebase itself is not closing.
Only the Studio editor closes, on March 22, 2027.
Anything left in Studio is deleted then.
Your live app keeps running.

**1** **Open your workspace**
Go to studio.firebase.google.com and sign in with the same Google account you used to build the app. You must be the person who created it.

**2** **Click** **Move now**
You will see this button at the top of the workspace.

**3** **Choose** **Zip and Download**

**4** **Save the zip in two places**
For example, your computer and a cloud drive.

**5** **Leave Firebase as it is**
You do not need to move or rebuild anything for your live app to keep running.

*Ready for a better version?*
**Build it better at Social Butterfly AI™.**
